## FOREWORD

The Ministry of Education, acting through the National Council for Curriculum and Assessment (NaCCA) has, in recent times, been working on curriculum and assessment reforms to improve the quality and relevance of learning experiences in pre-tertiary schools in Ghana. This curriculum, known as the Common Core Programme (CCP), is a sequel to the Kindergarten-Primary standards-based school curriculum, the implementation of which commenced with the 2019/2020 academic year. The CCP is carefully designed for learners in Basic Year 7 to Basic Year 9 (JHS 1 – JHS 3) as part of a holistic learning experience that prepares them for post-secondary education, the world of work or both. The curriculum focuses on building character and nurturing values, in addition to ensuring a seamless progression for all learners from JHS to SHS and creates clear pathways for academic and career-related programmes from Basic Year 11 to Basic Year 12 (SHS2 - SHS3).

In the twenty-first century, memorisation of facts and figures is no longer a sufficient learner attribute. Therefore, the CCP focuses on the acquisition of the 4Rs (Reading, wRiting, aRithmetic and cReativity) and core competencies to afford learners the ability to apply knowledge innovatively to solve everyday problems. Personal projects, community projects and community service have been integrated into the CCP as part of a comprehensive assessment programme, including assessment of knowledge, skills, attitudes and values that mainly emphasise what learners can do. It is hoped that the content of this curriculum will promote better high school education that meets the varied learning needs of the young people in the country and addresses the shortfalls in the current school curriculum in relation to learning and assessment.

The Ministry of Education is committed to ensuring that our schools develop globally competitive high school graduates who have the requisite employable skills and workplace ethos. The CCP curriculum will, therefore, play an important role in this regard. The Ministry will support the effective implementation of the CCP to include capacity development of all teachers to ensure improved learning experiences and outcomes for our young people.

**Dr Matthew Opoku Prempeh (MP)**

*The Honourable Minister of Education*

## ACKNOWLEDGEMENTS

This Common Core Programme (CCP) curriculum was developed together with the National Pre-tertiary Learning Assessment Framework (NPLAF) and Teacher's and Learner's Resource Packs. All these documents were developed by the National Council for Curriculum and Assessment (NaCCA), under the oversight and strategic direction of the Ministry of Education (MoE) with support from some agencies of the MoE and other relevant stakeholders.

NaCCA, acting on behalf of the Ministry of Education (MoE), would like to express its sincere gratitude to all its partners who participated in the professional conversations and discussions during the course of the development of the CCP curriculum.

NaCCA also extends special commendations to the leadership of the Ghana Education Service (GES), National School Inspectorate Authority (NaSIA), National Teaching Council (NTC), Commission for Technical and Vocational Education and Training (Commission for TVET) and other agencies of the MoE.

Additionally, NaCCA acknowledges the contributions of staff from various Universities and Colleges of Education as well as teachers and learners within the Ghana Education Service.

Special thanks go to those who also contributed to shaping this curriculum content through the consultation process, including the national stakeholder engagement conducted in Accra in February, 2020.

## INTRODUCTION

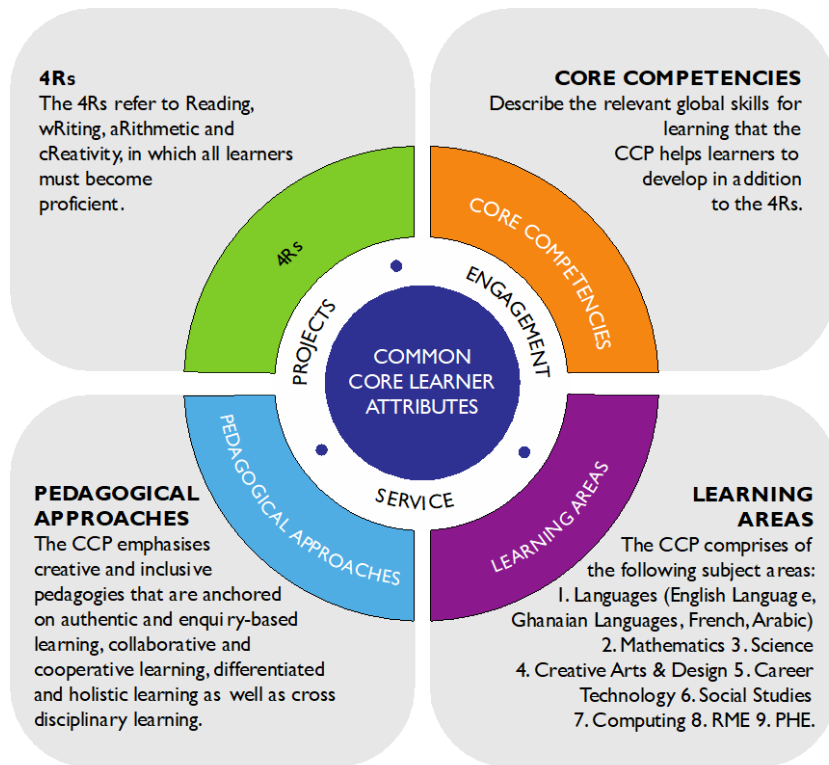

In the first three years of high school education, learners are expected to take a Common Core Programme (CCP) that emphasises a set of high, internationally-benchmarked career and tertiary education readiness standards. Learners need to acquire these for post-secondary education, the workplace or both. The standards articulate what learners are expected to know, understand and be able to do by focusing on their social, emotional, cognitive and physical development. The CCP runs from Basic Year 7 through Basic Year 9 (JHS 1-JHS 3).

The common core attributes of the learner, which describe the essential outcomes in the three domains of learning (i.e. cognitive, psychomotor and affective), are at the centre of the CCP (see Figure 1). Inspired by the values which are important to the Ghanaian society, the CCP provides an education of the heart, mind and hands in relation to the learner's lifetime values, well-being, physical development, metacognition and problem-solving abilities. Ultimately, this will produce character-minded learners who can play active roles in dealing with the increasing challenges facing Ghana and the global society.

The features that shape the common core programme are shown in Figure

1. These are:

- learning and teaching approaches – the core competencies, pedagogical approaches and 4Rs
- learning context – engagement, service and projects
- learning areas – mathematics, science, computing, languages (English, Ghanaian Language, French and Arabic), career technology, social studies, physical and health education, creative arts and design, and religious and moral education.

**Figure 1: CCP learner attributes**

## Learning and Teaching Approaches

- The core competencies: The core competencies describe the relevant global skills for learning that the CCP helps learners to develop in addition to the 4Rs. The global skills for learning allow learners to become critical thinkers, problem-solvers, creators, innovators, good communicators, collaborators, digitally literate, and culturally and globally sensitive citizens who are lifelong learners with a keen interest in their personal development.
- Pedagogical approaches: The CCP emphasises creative and inclusive pedagogies that are anchored on authentic and enquiry-based learning, collaborative and cooperative learning, differentiated learning, and holistic learning as well as cross disciplinary learning.

- The 4Rs across the Curriculum: The 4Rs refer to Reading, wRiting, aRithmetic and cReativity, which all learners must become competent in.

## **Learning context**

The CCP places emphasis on engagement of learners in the classroom activities, projects (in and outside classroom). These projects can involve individual or group tasks, which all learners are required to complete by the end of Basic Year 9. The CCP project provides learners with contexts to demonstrate creativity and inventiveness in various areas of human endeavour. Community service offers opportunities for learners to nurture, love and care for, and solve problems in their community.

## **Learning Areas**

The CCP comprises the following learning areas:

1. Languages (English Language, Ghanaian Languages, French, Arabic)
2. Mathematics
3. Science
4. Creative Arts and Design (CAD)
5. Career Technology
6. Social Studies
7. Computing
8. Religious and Moral Education (RME)
9. Physical and Health Education (PHE)

## **RATIONALE**

Language is both a medium of communication and a library in which the elements of culture are stored. It remains the most reliable means through which elements of culture are preserved and transmitted from generation to generation. First, the study of learners' first language and culture will make them conscious about their identity and equip them with effective communication skills that will provide them with the ability to appreciate the values embodied in their language and culture. They will know their cultural values and practices to help them become honest and responsible citizens in their communities.

Again, learners must be made to learn Ghanaian Language in their schools to enable them to access indigenous and educational knowledge. In the light of the current global development and technological advancement, the learning of a Ghanaian Language will help learners maintain their identity as Ghanaians. It will also help learners to integrate their knowledge in Ghanaian languages to the present-day global development and technological advancement.

In addition, research has proven that learners who are very good in their first language are able to learn a second language faster and better. This implies that emphasis must be put on the teaching and learning of Ghanaian Languages to serve as a foundation for the effective learning of English as a second language. This will therefore make learners bilingual, which is crucial in the current global world.

# PHILOSOPHY

## Teaching Philosophy

The Ghanaian language curriculum is informed by two main philosophical viewpoints explained below.

Children go through developmental stages as they learn language and research. It is clear that children develop language at their own pace as they interact with the social environment around them. Therefore, when children are provided with a good social environment, they develop their language and culture faster.

In teaching language and culture, the dimension to learning that this curriculum adopts is that reading and writing are active processes of constructing meaning from print. This is because children have in-built potentials to develop and acquire new language while approximating grammatical structures as they learn to speak. They invent names for the objects in their world from the beginning but gradually as they interact, they learn the appropriate language of the community.

Therefore, this view holds that in teaching language and culture, teachers must use the favourite phrase “meaning making” to describe how active the learner is in learning a first language and comprehending what they read or hear. In this way, the teacher serves as a guide and a facilitator to enhance the learners’ ability to decode text and support them to engage and make sense of what they read. This is to ensure that good readers constantly make hypothesis and predictions and modify them as they read along.

This calls for participatory and thematic approaches to help children to connect Ghanaian language learning in the classroom to solving real world problems. The teacher should therefore promote interaction and make learners to become active in constructing their own knowledge, thoughts and experiences. In this approach, teachers should recognise individual differences in language learning to ensure effective teaching of language in the classroom.

## Learning Philosophy

Language learning is not just listening, speaking, reading and writing. It involves the appropriate use of the language in an appropriate context. Teachers should therefore develop the linguistic and sociolinguistic competencies of the learners. Teachers should also promote effective use of verbal and non-verbal strategies in their communication. The Ghanaian language curriculum, therefore, assumes that learners who are knowledgeable in their first language are able to access indigenous and educational information effectively, construct their knowledge, thoughts and experiences efficiently, and appreciate their language, culture, and that of others and contribute meaningfully in the development of their communities as honest and responsible citizens.

# AIMS

## General Aim

The curriculum aims to develop individuals who are literate, good problem solvers, have the ability to think creatively and have both the confidence and competence to participate fully in the affairs of the Ghanaian society as responsible local and global citizens.

## Specific Aims

The overriding aim of the Ghanaian Language curriculum is to develop the linguistic and cultural awareness of the learner. The following aims may culminate into the achievement of this broad aim:

1. Heighten learners' sensitivity in their Ghanaian Language.
2. Acquire the basic skills that will help them decode appropriate age level text in the Ghanaian Language.
3. Read age level/appropriate text with ease, fluency, and with comprehension.
4. Cultivate a life-long habit of reading widely for information and pleasure.
5. Acquire a wide stock of vocabulary and understand grammatical structures as well as linguistic conventions for easy listening, speaking, reading and writing.
6. Cultivate in learners the ability to embrace diversity and to challenge stereotypes by giving everyone equal opportunity.

## PROFILE OF EXPECTED LEARNING BEHAVIOURS

A central aspect of this curriculum is the concept of three integral learning domains that should be the basis for instruction and assessment. A learner may acquire knowledge through some learning experience. They may also show understanding of concepts by comparing, summarising, re-writing in their own words, and constructing meaning from instructions.

### Profile of learning behaviour dimension

The learner may also learn to apply the knowledge acquired in some new context. At a higher level of learning behaviour, the learner may be required to analyse an issue or problem. At a much higher level, the learner may be required to synthesise knowledge by integrating a number of ideas to formulate a plan, solve a problem, pose a problem, or compose a story problem. Further, the learner may be required to evaluate, estimate, and interpret a concept. At the last level, which is the highest, learners may be required to create, invent, compose, construct, and design. These six learning behaviours (“knowing”, “understanding”, “analysis”, “synthesis”, “evaluation” and “creation”) described are referred to as dimensions of learning. “Knowing” is a dimension, “applying knowledge” is also a dimension. More than one dimension forms a profile of learning behaviour dimensions.

In this curriculum, learning indicators are stated with action verbs to show what the learner should know and be able to do (e.g. **“Identify the processes involved in naming a child.”** etc.) The learner being able to “identify” the process after obtaining several experiences means that they have acquired “knowledge”. Being able to explain, summarise, and give examples, etc., means that the learner has understood the concepts taught.

Similarly, being able to develop, defend, etc., means that the learner can “apply” the knowledge acquired in some new context. “Knowing”, “applying knowledge” etc., are dimensions that should be the prime focus of teaching and learning in schools. Teaching, in most cases, tends to stress on knowledge acquisition to the detriment of other higher level behaviours such as application of knowledge.

Each action verb in an indicator shows the underlying learning outcome or standard. It is therefore necessary for teachers to carefully read and comprehend the standards they plan developing in their learners each week, and identify the group of indicators learners have to demonstrate in achieving these standards. Teachers must ensure the group of indicators selected for the week reflect the whole range of the profile of learning behaviour dimensions, that is, from the low level (knowing”, “understanding, etc.) to the high level (solve or pose a problem, create a pattern, etc.). The focus is to move learning from the didactic acquisition of “knowledge, where there is fact memorisation, heavy reliance on formulae, remembering facts without critiquing them or relating them to the real world (surface learning) to a new position called deep learning. Learners are expected to deepen their learning through knowledge application to develop critical thinking skills, explain reasoning, and generate creative ideas that solve real life problems in their school lives, and later in their adult lives. This is the point at which learning becomes beneficial to the learner.

## Weighting of profile of learning behaviour dimensions

As already stated, it is important to consider the underlying behaviours for teaching, learning, and assessment. In basic level school Ghanaian Language, the three profiles of learning behaviour dimensions that have been specified for teaching, learning, and assessment are:

- Knowledge and Understanding 30%
- Application of Knowledge 40%
- Attitudes, Values and Process Skills 30%

Each of the learning behaviour dimensions has been given a percentage weight that should be considered in teaching, learning and assessment. The weights indicated on the right of the dimensions show the relative emphasis that the teacher should give in the teaching, learning and assessment processes.

Emphasising the three domains of learning (cognitive, affective and psychomotor) in your teaching will ensure that Ghanaian Language will not only be taught and studied at the cognitive level but will also lead learners to the acquisition of positive attitudes and skills that will enable them to deal effectively with life in general.

The explanation of the keywords involved in each profile of learning behaviour dimensions are as follows:

### Knowledge and Understanding (KU)

Knowing refers to the ability to remember, recall, identify, define, describe, list, name, match, state principles, facts, and concepts. Knowledge is the ability to remember or recall material already learnt and this constitutes the lowest level of learning.

Understanding is the ability to explain, outline, summarise, translate, rewrite, paraphrase, give examples, generalise, estimate or predict consequences based upon a trend. Understanding is generally the ability to grasp the meaning of some material or concept that may be verbal, pictorial, or symbolic.

### Applying Knowledge (AK)

This dimension is also referred to as “Use of Knowledge”. It refers to the ability to use knowledge or apply knowledge, apply rules, methods, principles, theories, etc. to situations that are new and unfamiliar. It also involves the ability to produce, solve, plan, demonstrate, discover, etc.

Applying knowledge as used in this curriculum has a number of learning behaviour levels. These include analysis, synthesis, evaluation, and creation. These may be considered and taught separately, paying attention to each of them equally in your teaching. The dimension “Applying Knowledge” is a summary dimension for all four learning sub-levels. Details of each of the four sub-levels are as follows:

**Analysing:** The ability to break down material into its component parts; to differentiate, compare, distinguish, outline, separate, identify significant points, etc.; the ability to recognise unstated assumptions and logical fallacies; ability to recognise inferences from facts, etc.

**Synthesising:** The ability to put parts together to form a new whole. It involves the ability to combine, compile, compose, devise, plan, revise, organise, create, generate new ideas and solutions, etc.

**Evaluating:** The ability to appraise, compare features of different things and make comments or judgment, compare, contrast, criticise, justify, argue, support, discuss, prove, conclude, prioritise, theorise, make recommendations, etc. Evaluation refers to the ability to judge the worth or value of some material, based on some criteria.

**Creating:** The ability to use information or materials, combine ideas or elements to create, form, produce, manufacture, invent, discover, design, or construct, formulate other (new) products. Creation is the highest form of thinking and learning skill and is, therefore, a very critical behaviour. This, unfortunately, is the area where most learners perform poorly. It is therefore necessary to help learners develop a high level of thinking right from the Basic level. To be effective, competent, and reflective citizens, who will be willing and capable of solving personal and societal problems, learners should be exposed to situations that challenge them to raise questions and attempt to solve problems.

## ATTITUDES, VALUES AND PROCESS SKILLS

At the heart of the curriculum is the belief in nurturing honest, creative, and responsible citizens with the requisite skills for national development. Learners, therefore, need to acquire positive attitudes, values, and psychosocial skills that will enable them to participate actively in lessons and take a stand on issues affecting them and others. The Ghanaian Language curriculum thus focuses on the development of attitudes, values, and skills.

**Values:** As such, every part of this curriculum, including the related pedagogy is consistent with the following set of values:

**Respect:** This includes respect for Ghana, its institutions and laws, and the culture and respect among its citizens and friends.

**Diversity:** Ghana is a multicultural society in which every citizen enjoys fundamental rights and responsibilities. Learners must be taught to respect the views of all persons and to see national diversity as a powerful force for national development. The curriculum promotes social cohesion.

**Equity:** Socio-cultural and economic environment across the country is uneven. Consequently, it is necessary to be deliberate in addressing the specific need of learners and to ensure an equitable distribution of resources. Ghana's learners have varied needs influenced by their gender, abilities, economic status, geographical background, etc. which requires the provision of equal opportunities to all.

**Commitment to achieving excellence:** Learners must be taught to appreciate the opportunities provided through the curriculum and persist in doing their best in whatever fields of endeavour as global citizens. The curriculum encourages innovativeness through creative and critical thinking, and the use of contemporary technology. Ghana will instil the value of excellent service above self.

**Teamwork/Collaboration:** Schools are to be dedicated to a constructive and team-oriented working and learning environment. This also means that learners should live peacefully with all persons with an attitude of tolerance and collaboration.

**Truth and Integrity:** The curriculum aims to develop learners into individuals who will consistently tell the truth irrespective of the consequences, be morally upright and have the attitude of doing the right thing even when no one is watching, be true to themselves and lawful beliefs, and be willing to live the values of honesty and compassion. Equally important, the ethos of the workplace, including integrity and grit, must underpin the learning processes to allow learners to see and apply academic skills and competencies in the world of work.

**Values of honesty and compassion:** Equally important, the ethos of the workplace, including integrity and grit, must underpin the learning processes to allow learners to see and apply academic skills and competencies in the world of work.

## **ASSESSMENT IN THE CCP**

Assessment is a process of collecting and evaluating information about learners and using the information to make decisions to improve their learning. Assessment may be formative, summative, diagnostic, or evaluative depending on its purpose. It is integral to the teaching-learning process, promotes learner learning, and improves instruction. In CCP, it is suggested that assessment involves assessment for learning, assessment of learning, and assessment as learning, which are described in the subsequent paragraphs.

### **Assessment for Learning (AfL)**

Assessment for Learning (AfL) is the process of seeking and interpreting evidence for use by learners and their teachers to decide where the learner is in their learning, where they need to be (the desired goal), and how best to get them there. AfL is one of the most suitable methods for improving learning and raising standards (Black and William, 1998). Assessment for Learning also refers to all the activities undertaken by teachers and/or by their learners, which provide information to be used as feedback to modify teaching and learning activities in which they are engaged. AfL can be achieved through processes such as sharing criteria with learners, effective questioning, and feedback.

AfL, therefore, provides timely feedback to ensure individual learners are assisted during the teaching and learning process using various strategies and questioning to measure the learning that has actually taken place. It is a continuous process that happens at all stages of the instructional process to monitor the progress of a learner and to offer feedback or change teaching strategies to achieve performance standards of a lesson.

### **Assessment as Learning (AaL)**

Assessment as Learning develops and supports learners' sense of ownership and efficacy about their learning through reflective practices. This form of self-assessment helps in building the competencies of learners to achieve a deeper understanding of their own learning and what they are taught.

### **Assessment of Learning (AoL)**

Assessment of learning provides a picture of the achieved standards of the teacher and performance of learners at the terminal stage of the learning process. This information provides data for accountability and educational decisions such as grading, selection, and placement, promotion, and certification. Through AoL, stakeholders such as parents and guardians are informed about the extent learners have attained expected learning outcomes at the end of their grade or programme.

### **What do we assess?**

Emphasis in assessment in the CCP is on the Common Core Learner Attributes, which are essential outcomes in the three domains of learning (i.e. cognitive, psychomotor, and affective).

Knowledge and skills with emphasis on the 4Rs in the learning areas.

Core competencies with emphasis on attitudes and values developed through the learning and its context as well as the pedagogical approaches.

The process is illustrated diagrammatically in Figure 2.

**Figure 2 Essential Assessment Features**

### **How do we monitor progress?**

School Based Assessments (SBA) covers all forms/modes of assessment including AfL, AaL and AoL (see Table I), that can be undertaken by any school-level actor (learner, teacher, head teacher) to monitor the learner’s achievement over a period of time. Data collection and keeping records of the data are central to the conduct of SBA.

**Table 1 Modes of Assessment**

Assessment for Learning	Assessment of Learning	Assessment as Learning
Class exercises	Class Assessment Task (CAT)	Portfolio
Quizzes	End of term tests	Journal entries
Class tests (written, oral, aural and/or practical)	End of year tests	Project work
Class Assessment Task (CAT)		Checklist
		Questionnaire

The following are samples of relevant records that can be kept on the learner's learning.

- Learner's Progress Record (Cumulative Record)
- Learner's Report Card
- School-Based Assessment Termly Recording Register

Details of guidelines on SBA can be found in *the National Pre-tertiary Learning Assessment Framework (NPLAF)* document (Ministry of Education, 2020a) and *the School-Based Assessment Guidelines* (Ministry of Education, 2020b).

## Reporting School-Based Assessment (SBA) in the CCP

The CCP uses a criterion-referenced model of presenting and reporting school-based assessment data. School-based assessment throughout the four-year duration of CCP is done against criteria linked to performance standards and not against the work of other learners. The CCP provides levels of proficiency to be attained and descriptors for all grade levels of the programme (see Table 2). These levels and descriptors cannot be changed by individual schools and are, therefore, common to all learners as well as learning areas nationwide. For each assessment criterion (or benchmark for the level of proficiency), a number of descriptors are defined as shown in Table 2.

**Table 2 Benchmarks, levels of proficiency and the grade level descriptors**

Level of Proficiency	Benchmark	Grade Level Descriptor
1: Highly Proficient (HP)	80% +	Learner shows high level of proficiency in knowledge, skills and values and can transfer them automatically and flexibly through authentic performance tasks.
2: Proficient (P)	68-79%	Learner demonstrates sufficient level of proficient knowledge, skills and core understanding; can transfer them independently through authentic performance tasks.
3: Approaching Proficiency (AP)	54-67%	Learner is approaching proficiency in terms of knowledge, skills and values with little guidance and can transfer understanding through authentic performance tasks.
4: Developing (D)	40-53%	Learner demonstrates developing level of knowledge, skills and values but needs help throughout the performance of authentic tasks.
5: Emerging (E)	39% and below	Learner is emerging with minimal understanding in terms of knowledge, skills, and values but needs a lot of help.

The grading system presented shows the letter grade system and equivalent grade boundaries. In assigning grades to pupils' test results, or any form of evaluation, the above grade boundaries and the descriptors may be applied. The descriptors (Highly Proficient [HP], Proficient [P], Approaching Proficiency [AP], Developing [D], Emerging [E], indicate the meaning of each grade.

In addition to the school-based assessment (SBA), a national standards assessment test is conducted in Basic 8 to provide national level indicators on learners' achievement.

### **Suggested Time Allocation**

Three periods a week, consisting of fifty minutes each, is allocated to the teaching of Ghanaian Language at the B7-B9 level.

## CREATIVE PEDAGOGICAL APPROACHES

The CCP emphasises creative and inclusive pedagogies that are anchored on authentic and enquiry-based learning, collaborative and cooperative learning, differentiated learning, holistic learning, cross-disciplinary learning (i.e. the 4Rs across the Curriculum) as well as developing the core competencies. This section describes some of the creative pedagogical approaches required for the CCP.

### Pedagogical Approaches

These include the approaches, methods and strategies for ensuring that every learner benefits from appropriate and relevant teaching and learning episodes, which are timely, assessed, and feedback provided to the learner and other stakeholders such as parents and education authorities. It includes the type and use of appropriate and relevant teaching and learning resources to ensure that all learners attain the expected level of learning outcomes. The curriculum emphasises:

- the creation of learning-centred classrooms through the use of creative approaches to teaching and learning as strategies to ensuring learner empowerment and independent learning.
- the positioning of inclusion and equity at the centre of quality teaching and learning. Inclusion includes addressing the varied needs of learners based on their gender, disability, economic status, religious affiliation, geographical location, etc.
- the use of differentiation and scaffolding as teaching and learning strategies for ensuring that no learner is left behind.
- the use of Information Communications Technology (ICT) as a pedagogical tool.
- the identification of subject specific instructional expectations needed for making learning in the subject relevant to learners.
- the integration of assessment for learning, as learning and of learning into the teaching and learning process and as an accountability strategy.
- use questioning techniques that promote and deepen learning.

### Inclusion

Inclusion is recognising that learners come from diverse background with varied needs and must be uniquely supported through the learning process. Learners can be disadvantaged based on their gender, ability, ethnic background, economic status, religious affiliation etc. Inclusion entails access and learning for all learners especially those disadvantaged. All learners are entitled to a broad and balanced curriculum in every school in Ghana. The daily learning activities to which learners are exposed should ensure that the learners' right to equal access to quality education is being met. The curriculum suggests a variety of approaches that address learners' diversity and their special needs in the learning process including addressing stereotypes that seek to limit the learner's interests and abilities. These approaches when used in lessons, will contribute to the full development of the learning potential of every learner. Learners have individual needs and different learning styles, learning experiences and different levels of motivation for learning. Planning, delivery and reflection on daily learning episodes should take these

differences into consideration. The curriculum therefore promotes:

- learning that is linked to the learner’s background and to their prior experiences, interests, potential and capacities; taking into consideration socially constructed role and expectations of the various groups in society and the limitations they come with.
- learning that is meaningful because it aligns with learners’ abilities (e.g. learning that is oriented towards developing general capabilities and solving the practical problems of everyday life); and
- the active involvement of the learners in the selection and organisation of learning experiences, making them aware of their importance in the process, and also enabling them to assess their own learning outcomes.
- equal access and opportunity given to all learners irrespective of social, economic, religious background.

## **Learning-Centred Pedagogy**

The learner is at the centre of learning. At the heart of the curriculum is learning progression and improvement of learning outcomes for Ghana’s young people with a focus on the 4Rs – Reading, wRiting, aRithmetic and cReativity. It is expected that at each curriculum phase, learners would be offered the essential learning experiences to progress seamlessly to the next phase. Where there are indications that a learner is not sufficiently ready for the next phase (B11-B12) a compensatory provision through differentiation should be provided to ensure that such a learner is ready to progress with their classmates.

The curriculum encourages the creation of a learning-centred classroom with the opportunity for learners to engage in meaningful “hands-on” activities that bring home to the learner what they are learning in school, and what they know from outside of the school. The learning centred classroom is a place for the learners to discuss ideas and through the inspiration of the teacher, actively engage in looking for answers through working in groups to solve problems. This also includes researching for information and analysing and evaluating the information obtained. The aim of the learning-centred classroom approach is to develop learner autonomy so that learners can take ownership of their learning. It provides the opportunity for deep and profound learning to take place.

The teacher should create a learning atmosphere that ensures:

- all learners feel safe, accepted and encouraged to actively participate in the learning process.
- learners are given frequent opportunities to interact with varied sources of information, teaching and learning materials and ideas in a variety of ways.
- the teacher assumes the position of a facilitator or coach who helps learners to identify a problem suitable for investigation via project work.
- problems are connected to the context of the learners’ world so that it presents authentic opportunities for learning.
- subject matter around the problem, not the discipline.
- learners responsibly define their learning experience and draw up a plan to solve the problem in question.

- learners collaborate whilst learning.
- demonstrate the results of their learning through a product or performance.

It is more productive for learners to find answers to their own questions rather than for teachers to provide the answers and their opinions in a learning-centred classroom.

## Differentiation and scaffolding

This curriculum is to be delivered through the use of creative approaches. Differentiation and Scaffolding are pedagogical approaches to be used within the context of the creative approaches.

**Differentiation** is a process by which differences between learners (learning styles, interest and readiness to learn etc.) are accommodated so that all learners in a group have the best possible chances of learning. Differentiation could be by task, support and outcome. Differentiation as a way of ensuring each learner benefits adequately from the delivery of the curriculum can be achieved in the classroom through:

- Task
- One-on-one support
- Outcome

**Differentiation by task** involves teachers setting different tasks for learners with different abilities e.g. in sketching the plan and shape of their classroom some learners could be made to sketch with free hand while others would be made to trace the outline of the plan of the classroom.

**Differentiation by support** involves the teacher providing a targeted support to learners who are seen as performing below expected standards or at risk of not reaching the expected level of learning outcome. This support may include a referral to a guidance and counselling officer for psychological and emotional support.

**Differentiation by outcome** involves the teacher allowing learners to respond at different levels. In this case, identified learners are allowed more time to complete a given task.

**Scaffolding** in education refers to the use of a variety of instructional techniques aimed at moving learners progressively towards stronger understanding and ultimately greater independence in the learning process.

It involves breaking up the learning episode, experience or concepts into smaller parts and then providing learners with the support they need to learn each part. The process may require a teacher assigning an excerpt of a longer text to learners to read, engage them to discuss the excerpt to improve comprehension of its rationale, then guiding them through the key words/ vocabulary to ensure learners have developed a thorough understanding of the text before engaging them to read the full text. Common scaffolding strategies available to the teacher include:

- giving learners a simplified version of a lesson, assignment, or reading, and then gradually increasing the complexity, difficulty, or sophistication

over time.

- describing or illustrating a concept, problem, or process in multiple ways to ensure understanding.
- giving learners an exemplar or model of an assignment, they will be asked to complete.
- giving learners a vocabulary lesson before they read a difficult text.
- clearly describing the purpose of a learning activity, the directions learners need to follow, and the learning goals they are expected to achieve.
- explicitly describing how the new lesson builds on the knowledge and skills learners were taught in a previous lesson.

## **Information Communication Technology**

ICT has been integrated into this curriculum as a teaching and learning tool to enhance deep and independent learning. Some of the expected outcomes that this curriculum aims to achieve through ICT use for teaching and learning are:

- improved teaching and learning processes.
- improved consistency and quality of teaching and learning.
- Increased opportunities for more learner-centred pedagogical approaches.
- improved inclusive education practices by addressing inequalities in gender, language, ability.
- improved collaboration, creativity, higher order thinking skills.
- enhanced flexibility and differentiated approach of delivery.

The use of ICT as a teaching and learning tool is to provide learners an access to large quantities of information online. It also provides the framework for analysing data to investigate patterns and relationships in a geographical context. Once pupils have made their findings, ICT can then help them organise, edit and present information in many different ways.

Learners need to be exposed to the various ICT tools around them such as calculators, radios, cameras, phones, television sets and computer and related software like Microsoft Office packages - Word, PowerPoint and Excel as teaching and learning tools. The exposure that learners are given at the CCP level to use ICT in exploring learning will build their confidence, and will increase their level of motivation to apply ICT use in later years, both within and outside of education. ICT use for teaching and learning is expected to enhance the quality and learners' level of competence in the 4Rs.

## **CORE COMPETENCIES**

The core competencies describe a body of skills that teachers at the basic level should seek to develop in their learners. The competencies describe a connected body of core skills that are acquired throughout the processes of teaching and learning. They are the relevant global skills for learning that allow learners to develop, in addition to the 4Rs, to become critical thinkers, problem-solvers, creators, innovators, good communicators, collaborators, culturally identified individuals, digitally literate and global citizens who are have keen interest in their personal development. In using this curriculum, we hope the core competencies will be developed in learners to help them develop our country, Ghana. These competencies include:

### **Critical Thinking and Problem Solving (CP)**

This skill develops learners' cognitive and reasoning abilities to enable them analyse and solve problems. Critical thinking and problem-solving skills enable learners to draw on their own experiences to analyse situations and choose the most appropriate out of a number of possible solutions. It requires that learners embrace the problem at hand, persevere and take responsibility for their own learning.

### **Creativity and Innovation (CI)**

Creativity and Innovation promotes the development of entrepreneurial skills in learners through their ability to think of new ways of solving problems and developing technologies for addressing the problem at hand. It requires ingenuity of ideas, arts, technology and enterprise. Learners having this skill are also able to think independently and creatively.

### **Communication and Collaboration (CC)**

This competence promotes in learners the skills to make use of languages, symbols and texts to exchange information about themselves and their life experiences. Learners actively participate in sharing their ideas. They engage in dialogue with others by listening to and learning from them. They also respect and value the views of others.

### **Cultural Identity and Global Citizenship (CG)**

This competence involves guiding learners to put country and service foremost through an understanding of what it means to be active citizens. This is done by inculcating in learners a strong sense of social and economic awareness. Learners make use of the knowledge, skills, competencies and attitudes acquired to contribute effectively towards the socioeconomic development of the country and on the global stage. Learners build skills to critically identify and analyse cultural and global trends that enable them to contribute to the global community.

## **Personal Development and Leadership (PL)**

This competence involves improving self-awareness and building self-esteem. It also entails identifying and developing talents, fulfilling dreams and aspirations. Learners are able to learn from mistakes and failures of the past. They acquire the skills to develop themselves and lead other people to meet their needs. It involves recognising the importance of values such as honesty and empathy and seeking the well-being of others. Personal development and leadership enable learners to distinguish between right and wrong. The skill helps them to foster perseverance, resilience and self-confidence. PL helps them acquire the skill of leadership, self-regulation and responsibility necessary for lifelong learning.

## **Digital Literacy (DL)**

Digital Literacy helps learners to discover, acquire skills, and communicate through ICT to support their learning. It also makes them use digital media responsibly.

For effective lesson planning for teaching, learning and assessment, it is suggested that teachers refer to Appendix A for details of the components of the core competencies.

## **INSTRUCTIONAL EXPECTATIONS**

Teachers are expected to:

- Guide and facilitate learning by creating a communicative environment for learners and challenging them to acquire the language based on their unique individual differences.
- Use of teaching and learning materials depicting real life communicative situations (authentic materials) as well as modern technologies (ICT).
- Use the task-oriented approach to learning foreign languages with the view to developing communicative competencies in the learner.

### **Integration of Skills**

A fundamental component of this curriculum is the integrated approach to the teaching of language skills and cultural values, in the sense that Listening, Speaking (cultural values), Reading and Writing are integral in building the grammatical and communicative competence of the learner. Grammar simply sets the rules for speaking, reading and writing correctly. This is not to shift the focus of language lessons to preaching grammatical rules. Small doses of these grammatical rules are fused into literature and composition as well as reading and oral work. It is, therefore, advantageous at this level to adopt an integrated approach in the teaching of language skills and cultural values. This means, for example, that as you teach a writing/composition lesson, relevant grammatical and cultural issues must be raised and explained in relation to the writing task. Similarly, such a lesson must have significant aural and oral components.

### **Approach to Language and Usage**

It is important to point out that at B7-B9, language and usage is basically internalised. It must be seen as an integral part of listening and speaking and treated as such. The main task is to assist learners to learn to use the listed language/grammatical items correctly and fluently. These should be introduced in meaningful situations in the context of everyday activities, modelled adequately and practiced orally by every learner. As much as is possible, the learner must not be bothered with grammatical terminologies, definitions and lengthy explanation of abstract grammatical concepts.

### **Listening and Speaking**

The section on Listening and Speaking in this curriculum has the following segments: conversation/everyday discourse, listening comprehension, speech sounds, tones, vocabulary development and presentation. The purpose of each of these segments is to encourage learners to listen carefully and carry out instructions and initiate a conversation in the Ghanaian language. The teacher must give the segments their due weight, balance and influence in the teaching process.

### **Reading Material**

To help the teacher achieve the indicators of the strand “Reading”, a list of themes for reading has been provided below. The themes have been carefully selected to help learners acquire vital information on health issues, as well as information on issues of current interest. The text developed must also touch on Gender

Equality and Social Inclusion (GESI). The teacher is further encouraged to use his/her initiative in improvising and planning new reading materials. It is a requirement that each learner should read three books on different themes each term, that is, nine books per year. Apart from the prescribed books, the teacher should also encourage learners to read any book they find interesting and written in his or her language of study.

### **Supplementary Reading Material**

The teacher is further encouraged to constantly look for other supplementary reading materials which will enhance the teaching/learning especially of the sections on “Listening and Speaking” and “Reading” Reading materials that focus on moral, ethical and social values such as honesty, diligence and integrity are particularly recommended.

### **List of Themes for Reading**

The following themes have been selected to be used in developing materials for reading from B7 to B9. The teacher is encouraged to look for reading materials that may be relevant to these themes, or select passages from other sources that will be of interest to learners at each level. Reading materials must also include the basic types of prose: narrative, creative, persuasive, descriptive, informative/academic writing, literary writing, letter writing and argumentative as well as bits of drama and poetry.

### **BASIC YEAR 7 (JHS 1)**

1. Drug Abuse
2. Natural Disasters - Earthquakes, floods, tremors, hurricanes, etc.
3. Road Accidents - Causes and Prevention
4. Water - Sources, importance and uses
5. Leisure
6. Gender Equality and Social Inclusion (GESI)
7. Computers/Technology
8. Forest Depletion

### **BASIC YEAR 8 (JHS 2)**

1. Historical events - Independence Day, February shootings, Formation of the UGCC and the struggle for independence
2. Communication - Letters, telephones, E-mail, print and electronic media
3. Social, moral and cultural values such as honesty, diligence, patriotism, commitment respect for elders, and care for public properties.

4. Teenage Pregnancy
5. Marriage and Gender Equality and Social Inclusion (GESI)
6. HIV/AIDS
7. Energy - Sources, importance, and conservation

### **BASIC YEAR 9 (JHS 3)**

1. Inventions
2. Computers/Technology
3. Forest Depletion
4. Entrepreneurship
5. Adolescent Reproductive Health
6. Marriage and Gender Equality and Social Inclusion (GESI)

### **Curriculum Reference Numbers**

The curriculum has been structured into four columns which are Strands, Sub-strands, Content standards, Indicators and Exemplars. A unique annotation is used for numbering the learning indicators in the curriculum for the purpose of easy referencing. The notation is indicated in Table 2.

**Example: B7.4.2.3.1**

<b>ANNOTATION</b>	<b>MEANING / REPRESENTATION</b>
B7	Year or Class
4	Strand Number
2	Sub-Strand Number
3	Content Standard Number
1	Learning / Performance Indicator Number

**Strands** are the broad learning areas or domains of the Ghanaian Language content to be studied.

**Sub-strands** are the sub-divisions of the broad learning areas or strands.

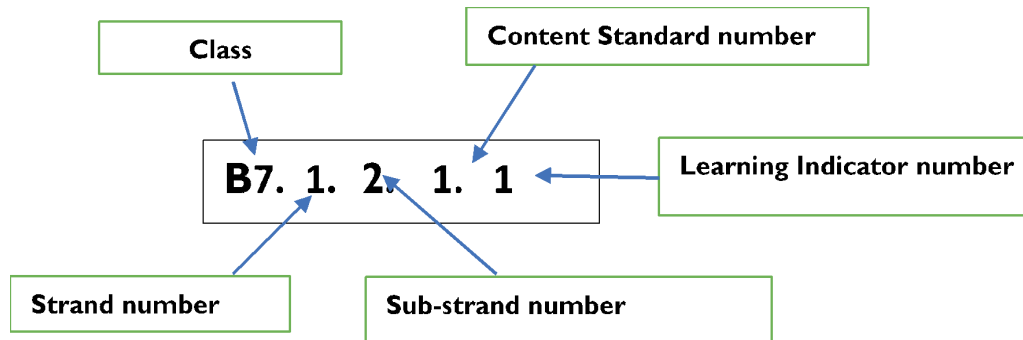

**Content standard** refers to the pre-determined level of knowledge, skill and/or attitude that a learner attains by a set stage of education.

**Indicators** are clear outcomes or milestones that learners have to exhibit in each year to meet the content standard expectation. The indicators represent the minimum expected standard in a year.

**Exemplars** clearly explain the expected outcomes of indicators and serve as support and guidance to the facilitator/teacher in the delivery of the curriculum.
